

Let's test our understanding of the short URL generation system with a quiz.

1

In the URL shortener system's design, the main reason to change the base of the sequencer to 58 was:

- A) To make the generated short URLs more secure.
- B) To enhance the readability of the generated short URLs.
- C) To improve the system's availability.
- D) To ensure the system's low latency.
